Terry –

I'm was working with the LPR report, and I've noticed since it was created that the LPR Arrests and LPR Recoveries are always either the same, or very similar numbers. It causes me to wonder if the data is being captured accurately since we know LPRs have been used to make arrests when no stolen vehicle is recovered, and sometimes we recover stolen vehicles without making arrests. Could you please have Jane/Lorie look into this issue? I copied / pasted the results from a report below.

Thank you,

Dan

Santa Maria Police Department
